CAREER SUMMARY

Recent Computer Science and Engineering graduate with a passion for full-stack web development, specializing in MERN stack, and Next.js. Experienced in building web applications through personal and freelance projects. Eager to apply strong skills in front-end development in a Full Stack Developer role with a focus on front-end technologies.

WORK EXPERIENCE

Personal Project: Urstyle

Remote

Full Stack Developer

July 2024 - Present

- I am developing a full-stack web application for curated fashion collections and affiliate marketing with integration from Myntra, Amazon, and Flipkart.
- I am implementing an admin interface for product management, allowing the creation of products with details like name, price, and description.
- Creating functionality for admins to curate collections by combining 2-3 complementary products, adding descriptions, and categorizing (e.g., ethnic wear).
- Designed a user interface that allows browsing of curated collections, with filtering options for easy navigation.
- Integrating affiliate marketing links for individual products to monetize user engagement.
- Utilizing Next.js for the front end, Express and Node.js for the back end, MongoDB for data storage, and TailwindCSS for styling.

Freelance Project: Keybolt

Remote

Front End Developer

Aug 2024 - Sept 2024

- Designed and developed a landing page for Keybolt, a platform aimed at helping local vendors and mom-and-pop businesses grow through AI-powered tools.
- Created an informative and engaging website to showcase Keybolt's services and allow potential clients to learn about and contact the company.
- Utilized front-end technologies to build a responsive and user-friendly landing page, optimized for lead generation and information dissemination.
- Implemented clear call-to-action elements to encourage business owners to reach out for growth opportunities.
